Shopify
(Liquid)
JavaScript
ReactJS
NextJS
jQuery
Bootstrap
HTML5
CSS3
SCSS
TailwindCSS

Additional

Tools:

Mocha
Chai
Webpack
Git
Jest
Jira

Back End:

Node.js
MongoDB
PostgreSQL
ExpressJS
GraphQL

Additional Skills:

RESTful APIs
Unit testing
Heroku
Mongo
Figma
Adobe Tools
Affinity Tools
E-commerce
Leading
Team Efficiency

ABOUT ME

I am a Software Engineer with extensive background in e-commerce. More specifically 10+ years experience, with 7 of those years managing and maintaining Shopify stores. I have experience in Javascript, ReactJS, ExpressJS, NodeJS, PostgreSQL, MongoDB, SCSS and serverless technologies. I am an extremely hard-working problem-solver that puts performant and high quality code first and I love learning new technologies in my free time.

WORK EXPERIENCE

SENIOR CONSULTANT

CapGemini // October 2021 - Current

- Javascript, HTML, CSS, SCSS, SQL, Shopify, Liquid, ReactJS, Jest

- o Leading a team of international and local developers in the submission and maintenance of a Shopify app utilizing the Shopify Payments API along with providing widgets to client Shopify themes.
- o Verifying code quality within the team and helping with various coding tasks including writing tests using Jest.
- o Providing project architecture knowledge and communication between dev team, management, and other dev teams.

FULL STACK DEVELOPER

Independent Contractor // September 2020 - October 2021

- Javascript, HTML, CSS, SCSS, SQL, Shopify, Liquid, Wordpress, ReactJS, NextJS

- o Generating repeat clients by providing exceptional code and consulting primarily for e-commerce companies on Shopify.
- o Building tools and solutions for these companies at their request, meeting with owners to brainstorm ways to streamline processes within their business.
- o Learning new technologies by rebuilding tools, building custom themes and small apps. Using React, Webpack, and serverless technologies to extend Shopify frontend.

FULL STACK DEVELOPER

Thinkful Coding Bootcamp // April 2020 - September 2020

- NodeJS, ExpressJS, PostgreSQL, MongoDB, ReactJS, Javascript ES6, HTML, CSS, SASS

- o Provided leadership and organization to multiple teams working on small-medium web app projects.
- o Improved upon and mastered many industry best-practices including semantic HTML, reactful design, and agile methodologies.
- o Deployed multiple small to medium sized web apps using both modern and tested technologies like ReactJS, SQL and no-SQL databases, and NodeJS.

IT CONTRACTOR

Dirt Masters LLC // January 2018 - February 2020

- Javascript, HTML, CSS, SQL, Shopify, Wordpress/Woocommerce, Bigcommerce

- o Developed and deployed an automated system to sync products to the e-commerce system in use.
- o Provide consultation and installation of e-commerce and storefront services.
- o Supported new technology deployment and provided maintenance on current systems including e-commerce, security, and Amazon systems.

GENERAL MANAGER

EcigSupply // January 2013 - February 2020

- Woocommerce, 3dCart, Magento, Shopify

- o Lead 5 retail stores with multiple managers and teams in providing the best customer service and producing the most revenue for the company.
- o Started as a full time employee and was promoted to general manager of multiple stores within a few years due to my performance and knowledge in business and technology.
- o Provided oversight and maintenance to our e-commerce solutions which included both retail and B2B using many different tools and CMS's.

MORE INFO

RECENT PROJECTS

SPORT FORMULA ◦ <https://sportformula.com>

- *Webpack, Liquid, jQuery, Bootstrap, Javascript, SCSS*

Contract client that sells their own brand of vitamins and supplements utilizing Shopify.

- Made modifications to their pre-purchased theme at the request of the owner. Modifications were made based on the look of a similar site in another niche.
- After maxing out the performance of the purchased theme, I was tasked with remaking the current theme from scratch, to be as performant as possible and to make future iterations easier.
- Integrated serverless functions to handle data fetching to Shopify API and Recharge API.

HINT WATER ◦ <https://drinkhint.com>

- *Webpack, Liquid, Javascript, Preact, SCSS, Shopify API, Recharge API*

Contract client that sells flavored water online and in major grocery stores.

- Provided support with various feature additions requested by design team.
- Utilized Webpack to increase performance along with Preact and Shopify API's to add features and fix issues.
- Added features and helped architect certain aspects of Recharge subscription center using Recharge API

SKUTHINGS ◦ <https://skuthings.com>

- *Webpack, Javascript, GraphQL, Netlify, Postgres, RedwoodJS*

Product management SaaS for small to medium sized businesses that provides powerful tools like inventory tracking, listing management, and more.

- Scaffolding components for front end use that receive data from API calls to our database.
- Architecting API and database for future proofing as best as possible.
- Handling deployment using Netlify and DigitalOcean Database cluster.

UGC DASHBOARD ◦ <https://ugcdashboard.com>

- *Webpack, Javascript, GraphQL, Netlify, Postgres, RedwoodJS*

User generated content management platform with authorized-use recording and displays that can be embedded to websites.

- Scaffolding components for front end use that receive data from API calls to our database.
- Architecting API and database for future proofing as best as possible.
- Handling deployment using Netlify and DigitalOcean Database cluster.

BIOHACKING THEME ◦ Not in production

- *Webpack, Liquid, jQuery, Bootstrap, Javascript, SCSS*

Shopify custom theme commissioned by growing agency to sell to their clients.

- I was given a very advanced design and a 1 month deadline to develop this theme from scratch.
- I used Webpack to codesplit the Javascript, and to compile the SCSS to CSS, then codesplit that as well.
- I was able to develop the theme in the time given, and shortly after rebuilt the theme to fit OS2.0 standards.
